Re: Proposed Application for
CANDIDIN -- Dkt. 3199

Dear Dr. Taber:

With all the assistance that you and Dr. Vining gave me on Saturday morning I have now revised the proposed patent application for candidin and enclose the ribbon copy, together with a carbon copy for your files. I am also sending a carbon copy to Dr. Lechevalier.

As agreed Saturday, the inventors are yourself, Dr. Vining and Dr. Waksman. I would appreciate it if all concerned would read this over again very carefully. If there are any corrections please let me know before you sign the papers.

If everything is all right, the application should be signed on the last page by the three inventors, before a Notary, who will execute the Notarial clause and who must affix the Notarial seal.

The assignment should also be signed by the three inventors, again before a Notary, who will execute the Notarial acknowledgements and affix his seal.

A carbon copy of the assignment is also enclosed for your file.

When the original papers are signed, please return them to us at once so that we can forward them to the Patent Office.
